conference delegates for drinks and
canapés at the Conference Cocktail
Function following the launch

Please RSVP by COB Friday, 7 May 2010
Toni.Fulton@rrrc.org.au, (07) 4050 7400

The product of a collaborative applied research program involving the Queensland Department of Transport and Main Roads, Rainforest CRC and the Australian Government's MTSRF, the two-part 'Roads in Rainforest' Guidelines were developed as a framework for understanding the primary ecological issues to be addressed in roads management, and to provide a set of principles and supporting guidelines for implementing the best practice planning, design and management for ecologically sustainable roads within rainforests throughout Queensland.
