Reef Science Session

The Reef and Rainforest Research Centre Ltd (RRRC) presents
an information evening for marine biologists and reef guides

YOUR INVITATION

Join us for a free evening presentation on current research funded by the Australian Government's Marine and Tropical Sciences Research Facility (MTSRF) relevant to you and your industry.

Find out how MTSRF-funded research outputs are already being adopted through the unique engagement structure of the RRRC to enhance the sustainability, use and management of the Great Barrier Reef and how easy it is to access up-to-date, freely available information on reef related research.

The session will also cover the health and status of the Great Barrier Reef; trends in reef tourism; the effects of 'Green' zones on fish populations; the effects of poor water quality on the reef; the potential impacts of climate change on seabirds and turtles; the value of sharks to the tourism industry; and much more.

Cairns

Thursday, 24 September 2009

5:30pm – 6:00pm

**Reef Magic Vessel, Marlin Marina
(Marina at The Pier Market Place)**

Short presentations by guest speakers. Light refreshments provided.
